Anthracite Filter Media

Graded anthracite coal granules used as the top layer in dual-media filters. They hold more dirt than sand alone, so filters run longer between backwashes and lose less pressure.

Form	Particle size	Packing
Granules	**0.8–1.6 mm**	**25 or 50 kg bags**

Highlights

- Removes suspended particles, cloudiness and some organic matter.
- Lets a filter run longer between backwashes, with less pressure loss.
- Hard, clean granules that do not break down and last for years.

Specifications

Form	**Granules**
Particle size	**0.8–1.6 mm**
Packing	**25 or 50 kg bags**
Removes	**Suspended solids, turbidity**

Figures are typical. Every plant is sized to your water and confirmed with the quote.

Used in

- Dual and multimedia filters
- RO pre-treatment
- Municipal water treatment
- Wastewater tertiary filters
- Swimming pool filters
