RO Anti-Scalant (Liquid)

A liquid anti-scalant dosed into RO feed water to stop hardness and silica from forming scale on the membranes. It keeps output steady, cuts cleaning and makes membranes last longer.

Form	Grade	Typical dose
Liquid	**Technical grade**	**2–5 ppm**

Highlights

- Stops calcium, magnesium and silica scale from building up on RO membranes.
- Keeps output and pressure steady between cleanings.
- Low dose: a few ppm of feed water, given by a small dosing pump.

Used in

- Commercial and industrial RO plants
- Packaged drinking water units
- Seawater desalination plants
- Nanofiltration systems

Specifications

Form	**Liquid**
Grade	**Technical grade**
Typical dose	**2–5 ppm**
Packing	**25 kg and 50 kg cans**
Made in	**India**

Figures are typical. Every plant is sized to your water and confirmed with the quote.
